Non-Functional Testing Process

Non Functional Testing Parameters

- Availability
- Efficiency
- Reliability Testing
- Survivability
- Flexibility
- Reusability
- Interoperability Testing
- Portability
- Performance Testing

Functional Vs. Non-Functional Testing

Functional Testing:

A black box testing type, this type of software testing involves complete integration of the software to check its compliance with the specified requirements.

Non Functional Testing:

Unlike functional testing, this type of software testing is usually performed against the non-functional requirements to check the readiness of the software system.
